Art Unit: 1626

Receipt is acknowledged of the amendment filed January 27, 2006, which has been entered in the file.

The first paragraph of the specification concerning the related applications should be amended to include the patent number of the parent application.

The indicated allowability of claims 11 to 30 is withdrawn in view of the new objections and rejections that follow.

Claims 10, 13, 20 and 23 are objected to because of the following informalities: in claims 10, 13 and 20 "chelatingmoiety" should be -chelating moiety-. In claim 23 "aormatic" should be -aromatic- and on line 2, "form a" should be -forms an- and after R⁴² "form" should be -forms-.

Appropriate correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 11, 15, 21 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrases "having a formula" and "comprising a formula" render the claims indefinite because it is not clear what else

Art Unit: 1626

is included in the formula. To overcome this rejection the expressions should be changed to -of the formula-.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 22 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,716,979. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are identical except for the proviso in claim 22 of the instant application that at least one of the Rs is a conjugates substance. Thus the claims overlap

Art Unit: 1626

when at least one of the Rs in the patent claim is a conjugated substance. The compounds of the instant application and the patent have the same utility as dyes. Therefore one of ordinary skill in the art would have been motivated to make the claimed compounds with the expectation that additional compounds useful as colored and fluorescent dyes would be obtained.

Claims 2 to 9, 12, 14, 16 to 19 and 24 to 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
